Materials
Lab**

PARSONS
THE NEW SCHOOL

A piece of off-white paper is pinned to a dark brown wooden surface with a metal fastener. The paper has the text "NONTOXUNIKUM" written on it in a black, sans-serif font. The paper is slightly tilted and has a small hole at the top where the fastener is attached.

NONTOXUNIKUM

Not a showcase. A beginning.

Health in construction.

A Shift

Choices leave traces.

The question that changed everything.

What if public space could care for us?

Leadership. Local. Craft. Science.
Community, Care.

See. Smell. Feel.

What is different?

Toxic or Non Toxic?

Education

Professional training and knowledge transfer

Material library

Curated collection of healthier biobased materials

Public events

Non Tox Days, Non Tox Talks and professional discussions

Project support

Working directly on real building and spatial projects

Materials matter. Health matters.

We matter.

Joining forces matter.

A conversation starter.

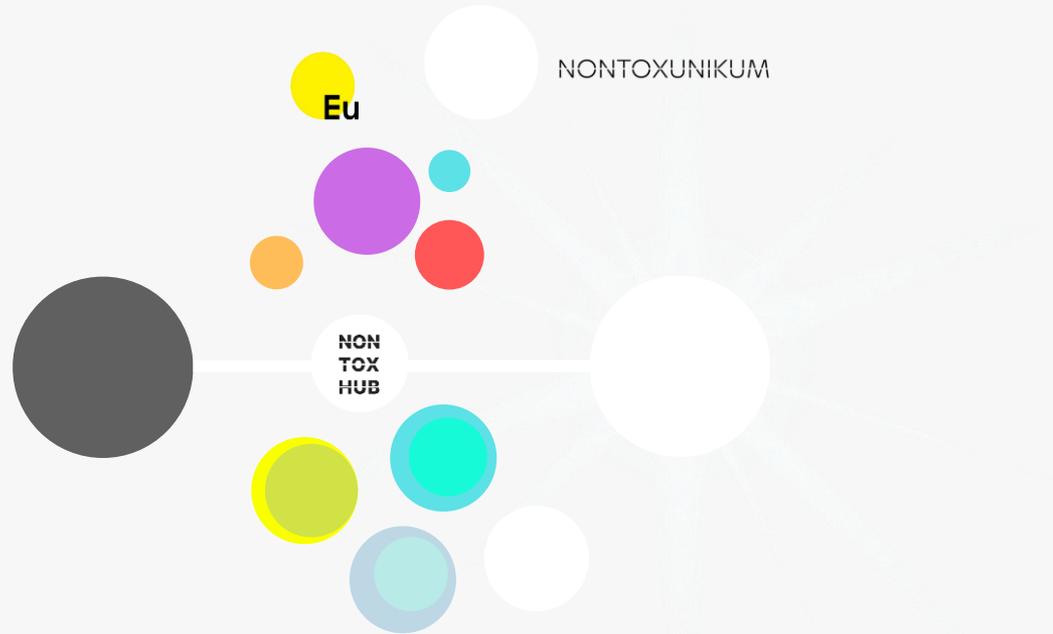

Fill the gaps.

From Matter to Meaning
From a Spark to a Movement

Let's Build Differently. Together.
