

Smart Factories of Tomorrow

Caroline Viarouge
CEO of EIT Manufacturing

26 March 2025

eitmanufacturing.eu

For Europe to prosper, manufacturing needs to thrive

Innovation is key

Manufacturing in Europe represents:

16%

GDP

2.1 m

Enterprises

32 m

Jobs

EUR 7.2 tn

Revenue

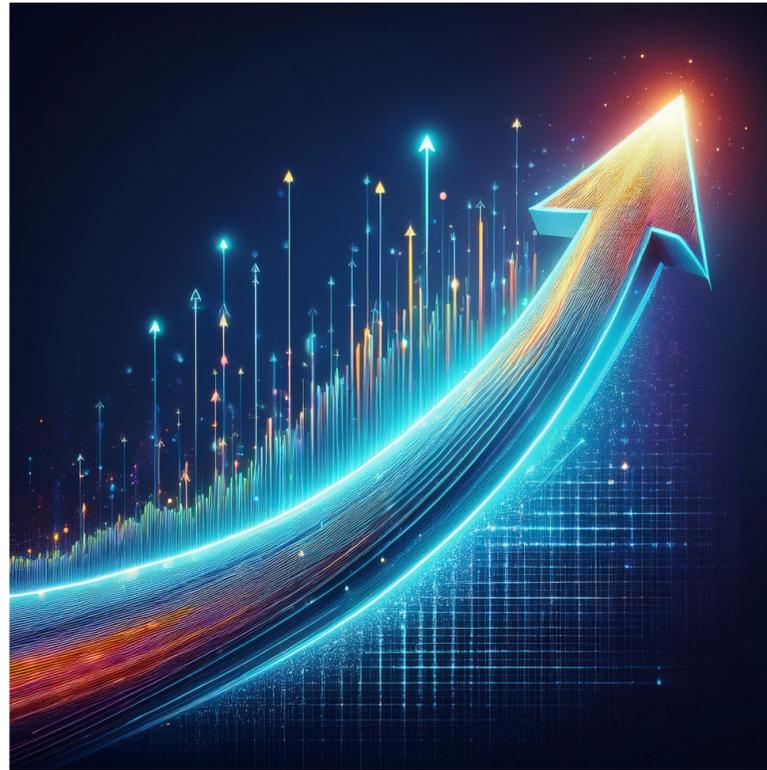

Key industry challenges

**Sustainability
commitment**

Competitiveness

**Geopolitical
shift**

Skills gap

EIT Manufacturing is accelerating the industry's path to regain competitiveness

**Broadening
network and
collaboration**

**Boosting viable
innovation**

**Developing
skills and
competences**

**Accelerating
sustainable
growth**

Pan-European with local presence

● Headquartered in Paris

Six regional offices covering all European countries:

■ **Central Region**
Darmstadt

■ **East Region**
Vienna

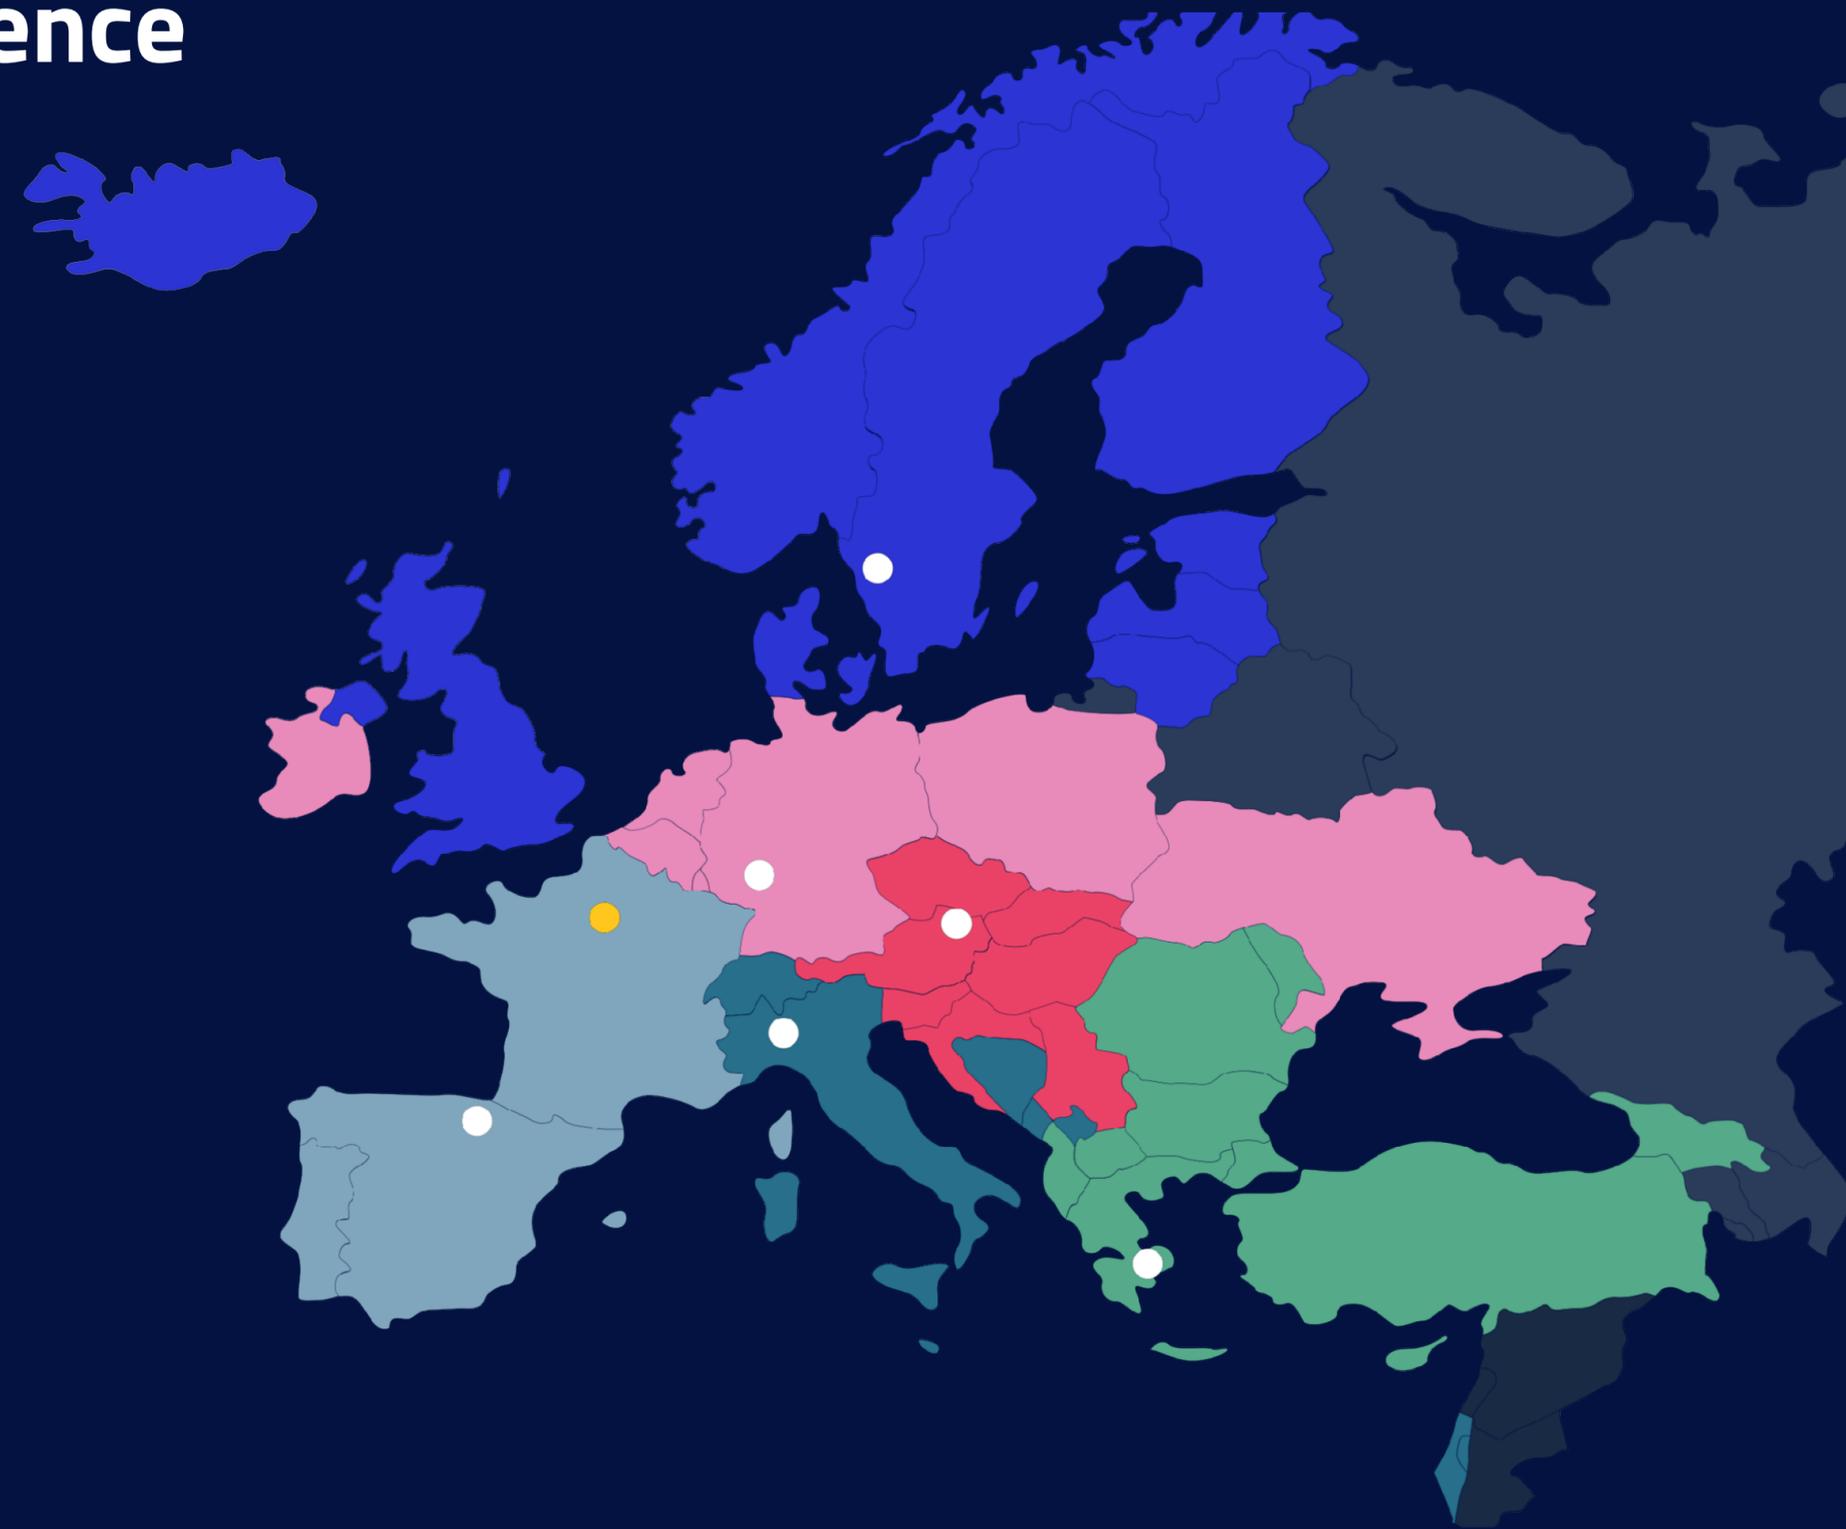

■ **North Region**
Gothenburg

■ **South Region**
Milan

■ **South-East Region**
Athens

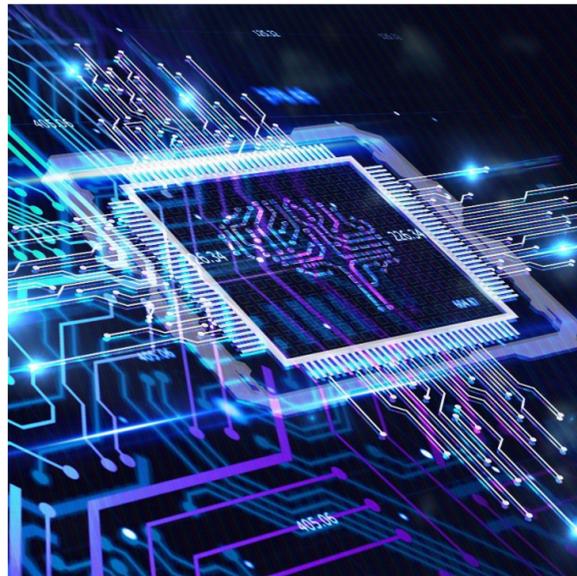

■ **West Region**
San Sebastian

g+ 180+ employees

We focus on five key themes impacting the manufacturing industry

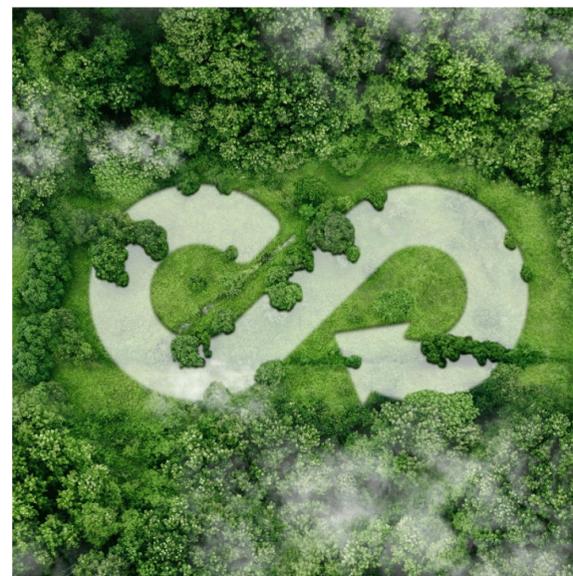

AI/Data

Industrial Metaverse

Circular Economy

Net Zero Industry

Renewable Energy

Growing a powerful network of more than 200 partners

Last update: November 2024

INDUSAC – Horizon Europe

EIT Manufacturing is part of a European project called INDUSAC, led by Jozef Stefan Institute (JSI) from Slovenia.

Goal: to validate industry-academia collaboration mechanism through the implementation of at least 300 international co-creation projects, led by diverse teams of students, researchers and industry professionals.

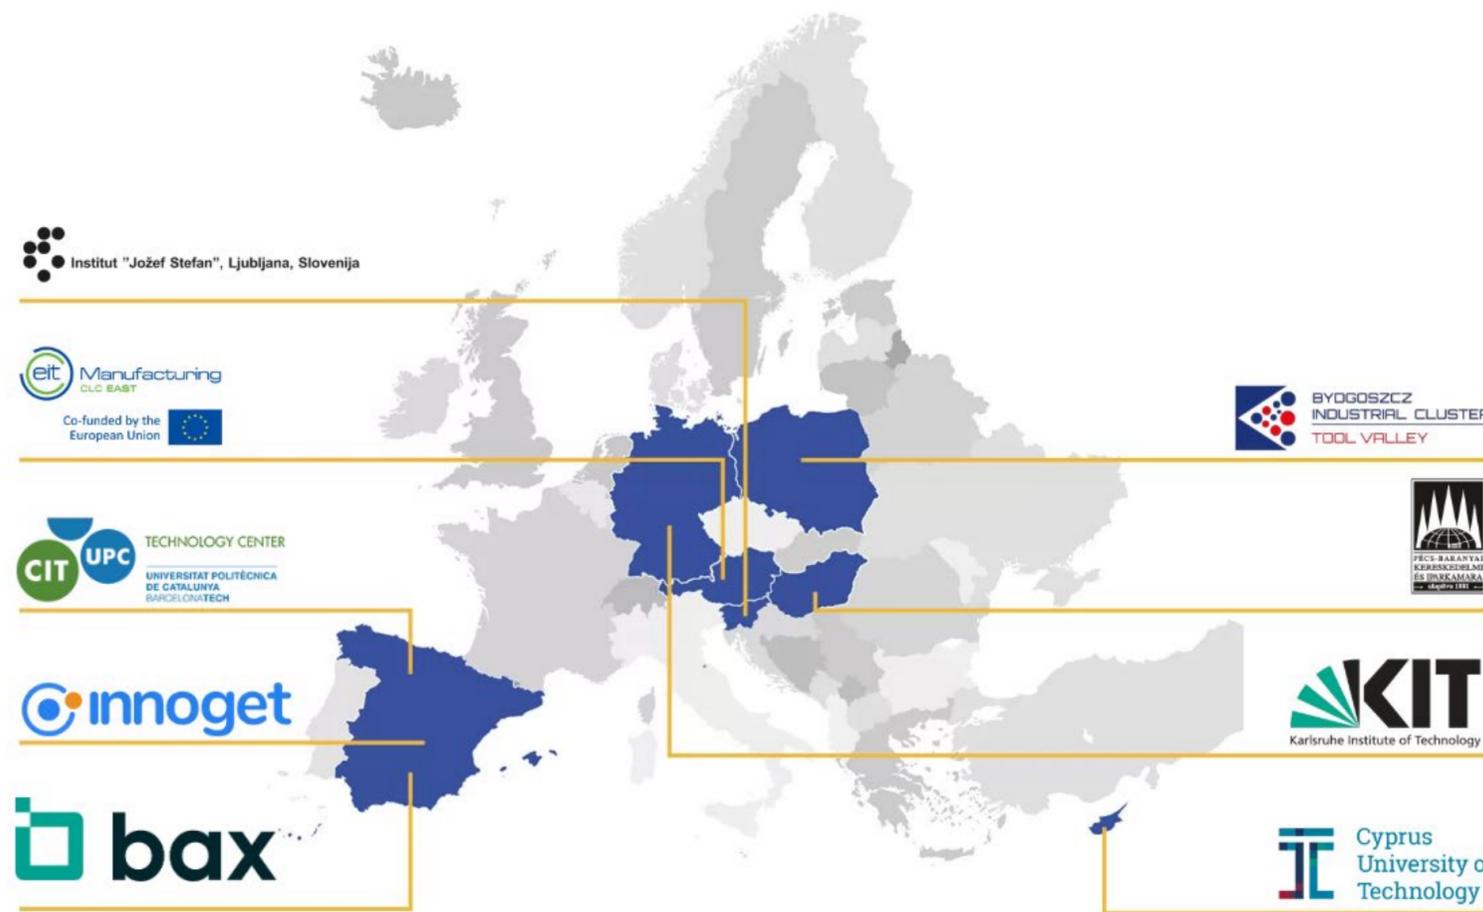

Focus areas: Circularity, sustainability, digitalisation and Industry 4.0.

Upcoming deadlines for submission:

31 March 2025

15 April 2025

More info:

EIT Manufacturing projects in Slovenia

Boosting viable
innovation

CfP project –Raptor Ongoing - 2025

Consortia members: Kolektor,
JSI, University of Ljubljana

Raptor introduces
groundbreaking techniques by
integrating custom-designed
electromagnet and scanning
systems within 3D printers.

Empowering SMEs Call

Companies involved: Metronik and
Weiler

Metronik d.o.o. is an advanced
energy management software
that provides real-time
monitoring, analytics, and
reporting to optimise energy
consumption in manufacturing and
infrastructure sectors.

Investing in Salesqueeze to propel growth

Accelerating sustainable growth

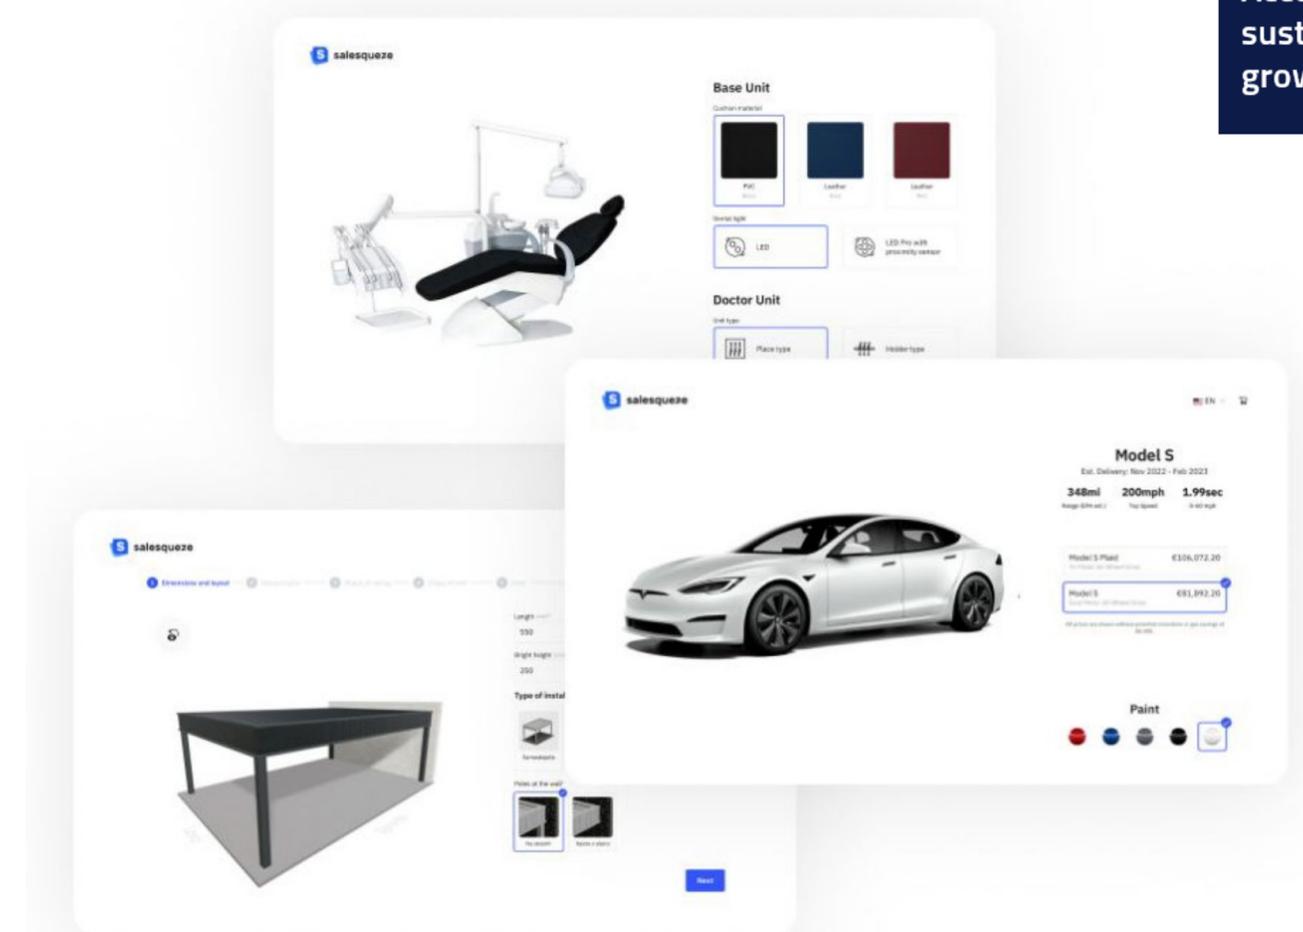

Slovenian startup Salesqueeze made a platform allows manufacturers to offer configurable and customisable products.

- A Configure Price Quote (CPQ) platform for manufacturers with a focus on visualisation and user experience.
- Faster sales cycles and time-to-market thanks to automating complex configurations.
