

Hydrogen Pilot Summit

18 November 2024 | 09:30 – 13:00

Permanent Representation of the Republic of Slovenia to the European Union,
Rue Joseph II 14, 1000 Brussels

The *Vanguard Initiative* is a unique alliance of the most advanced industrial regions in Europe, focused on stimulating industrial innovation and building European value-chains based on complementarities in regional smart specialisation strategies. The **core activity of the Vanguard Initiative is the implementation of its Pilot Projects**, which have been developed through the active participation of clusters, science parks, research institutes and universities in the member regions.

The *Vanguard Initiative's Hydrogen Pilot* will for the very first time organise an event dedicated to presenting its activities to the wider Brussels community during the European Hydrogen Week.

*While all the speakers and topics have been confirmed, for those actively involved in the field and **interested in presenting** their work are nevertheless welcome to contact the organisers via drasko.veselinovic@sbra.be to be included in the programme (see segment beginning at 11:15).

Programme

Moderated by Dr. Draško Veselinovič,
Slovenian Business and Research Association (SBRA)
