

National Demo Center Smart Factories (NDC PT)

Asst. Prof. Dr. Igor Kovač

Head of Center RIP nat JSI and director SRIP FoF

Why NDC PT?

Slovenia is very industrialised county

Active companies: 22.253

Manufacturing: 91,8%

Employees: 239.000

Added value: 37 milliard EUR

Share of industry in total gross value added: 23%

increase gross value added!

Slovenia for

Increasing productivity,

Efficient production,

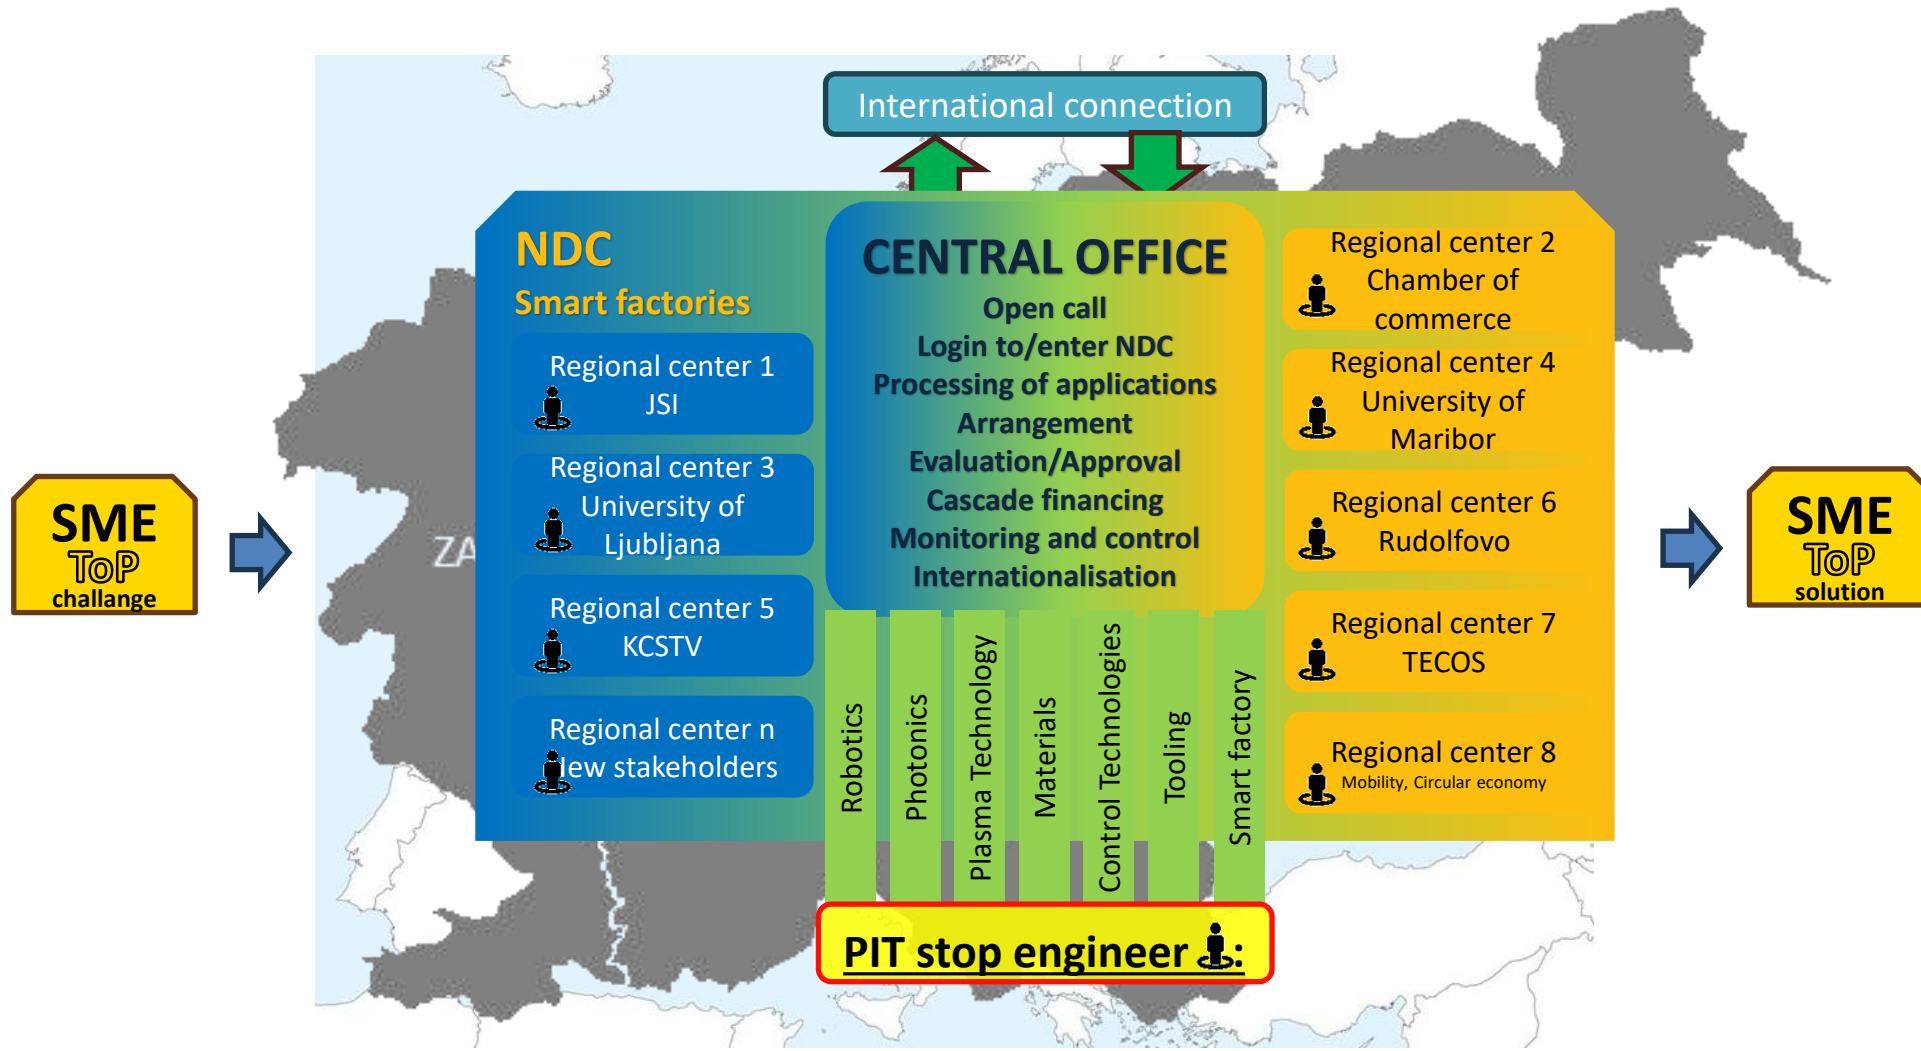

Digital transition,

Introduction of green technologies,

urgently needs

a strategic instrument at the national level!

Structure of NDC PT – Distributed national instrument

Key services and support

- **A single national entry point (“one-stop shop”) for companies.**
- **Test-before-invest** – testing technologies before making an investment and reducing development risks.
- **Pit Stop Engineer** – mobile teams of top experts who visit companies, perform a technological assessment, connect them with the best research expertise within NDC PT, transfer the technologie into the companies and support the implementation of solutions to production.
- **Digital Academy** – developing competencies in artificial intelligence, robotics, automation, digital twins, and advanced manufacturing.
- **Regional network of demonstration and development centres**, integrated into a unified national system.
