Synchronising Micro-Credentials in the EU Ecosystem:

Opportunities and challenges for learners, employers, and higher education institutions

27 May 2025 | 09:00 – 15:00

***Permanent Representation of Slovenia to the EU
Rue Joseph II 14, 1000 Brussels***

In the context of a rapidly changing socio-economic landscape, micro-credentials are gaining traction across Europe as a flexible and targeted approach to education and workforce development. This seminar will bring together experts from academia, industry, and policy to explore their role in upskilling, reskilling, and aligning higher education with labour market needs. Emphasis will be placed on quality assurance, trust-building, and integration into national frameworks and corporate HR systems. The event will feature keynote presentations from prominent figures, as well as a roundtable on harmonising quality standards across institutions. Attendees will also have the opportunity to network and engage in cross-sector dialogue.
