

Embedding Macroregional cooperation in territorial Smart Specialisation strategies

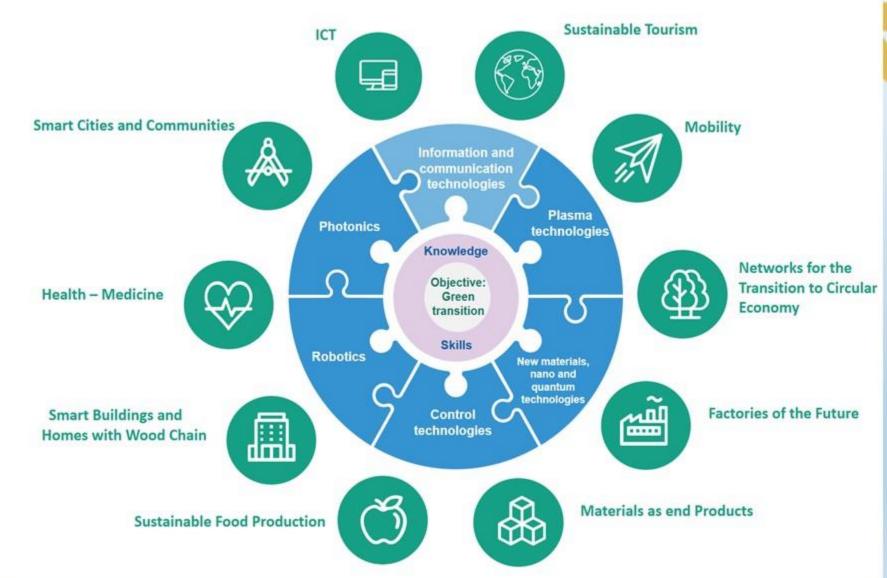

- Potential and importance of <u>MacroRegional</u> <u>cooperation</u> / projects like BlueAir for national/regional development policies
- Case of <u>BlueAir project & S5</u> Experience & Added value
- Lessons learnt and different possibilities for <u>capitalisation</u>

WHY S5? → S5 Logic:

S4 -> S5: Main Characteristics

- More coherent and overarching Logic of S5
- Stability of the main structure Priority areas remain the same with more attention/visibility to Digital becoming now a separate priority (analysis & EDP)
- Stability in terms of Governance structure MLG SRIPs
- Stability and expansion in terms of Policy mix measures and sources of financing
- Clear and understandable Main Goal Green transition
- Clear "Enabling conditions" for the goal: (i) with adequate Knowledge and skills, (ii) through empowered/more visible KETs (iii) on selected Priority domains (Focus areas / Product Groups)
- More visible <u>"horizontal"</u> topics of S5: (Green & Sustainable S5, SBE, SI & S-Econ)

S5: S-Blue Economy development? – where is BlueAir/MRApproach?

- S4 → S5: S-Blue economy has now its place and potential in S5
- ➤ However, No dedicated priority nor focus area → embedded in some of the identified Product lines/FAT
- Mapping of SBE potential → more precise identification of dedicated Product line(s) in future; Champions but lower/no critical mass → why not upgrading national with more detailed MR approach? →
- ▶ BlueAir project! use of MRA for EDP, International dimension & potential for TA 2way street of SBE: from Nat/Reg S3s' to design a MR S3 & from MR potential & identification to embed TA in Nat/Reg S3s' AV
- Not to forget!: EDP is a continuous phenomenon ⊕ and open all the time → adaptation of S3s

Future belongs to Green & Blue

Lessons learnt / Capitalisation

Lessons learnt - possible areas of capitalisation:

- Importance of MRC in areas of lower critical mass on regional/national level & high potential with joint interest on MR level
- ➤ Use of this/similar approach in other MR Programmes
- Use of experience also for other topics/areas of MR Cooperation
- ➤ Further development of (this and similar) strategic projects on policy level in a way to "marry" them with some possibly already existing concrete successful cases (or develop a new pilot case in one of identified priority potential) and/or expand geographically
- ➤ Importance of BIC/AIIC (CoP), Skills & Competences

Future belongs to Green & Blue
