Daily Centres

Under Centre for
Social Work

From vision in 2016 to reality in 2017, expanding from 11 to 19 centres serving every district: providing daily quality services.

Reaching Every Young Person

Innovation on Wheels

Bus Ljuba and Drago represent spaces on wheels, reaching communities without dedicated facilities.

Every young citizen deserves access to quality youth work in their place of residence.

These mobile centres provide inclusive environments through sport, culture and play.

Trained youth workers create welcoming spaces where everyone belongs.

Running the process

PEOPLE enter a project with values that are constantly being talked about - harmonised values are a solid foundation for working together.

The **IDEA** stems from a strategically defined need in the city and from an opportunity where the right people find each other.

LEADERSHIP was based on moderation skills that enable inclusivity and maintain a space for communication and input from participants.

EXPERTISE participates at the intersection of youth work, creative industries and engineering and forms a public-private partnership.

YOUNG PEOPLE gained valuable experience, develop skills in teamwork, responsibility and leadership. They expanded their network and contribute to both the community and their personal growth.

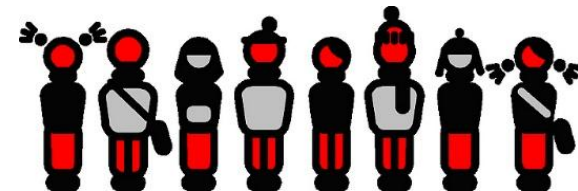

Today

- The bus Ljuba and Drago is a mobile youth centre, offering a regular daily programme for young people. A living room for young people in the so-called “grey zones of Ljubljana”. It does so in line with the City of Ljubljana’s Youth Strategy 2016–2025.
