## My research

1. **Discourses and practices of climate change mitigation through tree planting in the Global South:** How climate change mitigation is framed and negotiated at different levels and how investments in climate change mitigation affect rural livelihoods and biodiversity.
2. **The governance of food security under climate change-** eg wider discourses governing agricultural policies and technologies directed at African smallholders and the lived effects of these policies.
3. **Theoretical and methodological focus:** Qual social science, ethnography, discourse analysis, STS, interdisciplinary collaboration

## Collaborative interest

- **Partner in research evaluating eg climate change mitigation efforts, biodiversity offsetting, natural resource conservation**
- **Can contribute with QUALITATIVE SOCIAL SCIENCE PERSPECTIVES eg discourse analysis of policies, ethnographic fieldwork unveiling local livelihoods, practices , perspectives and priorities.**
- **Competence on RURAL CONTEXTS, mainly from South Africa and Uganda. Also Zambia, Kenya and Tanzania.**
