Fidelio Biogas sp. z o.o.

Horizon Europe Matchmaking Event
Energy Research

19 October, 2021

Fidelio Biogas sp. z o.o.

Developing a universal biogas plant that processes organic, agricultural and municipal waste

- Biogas startup - qualified for the Innovative Biogas Plant competition run by the National Centre for Research and Development (NCBR) in Poland

Characteristics:

a) Universal

- Processes all waste

b) End products

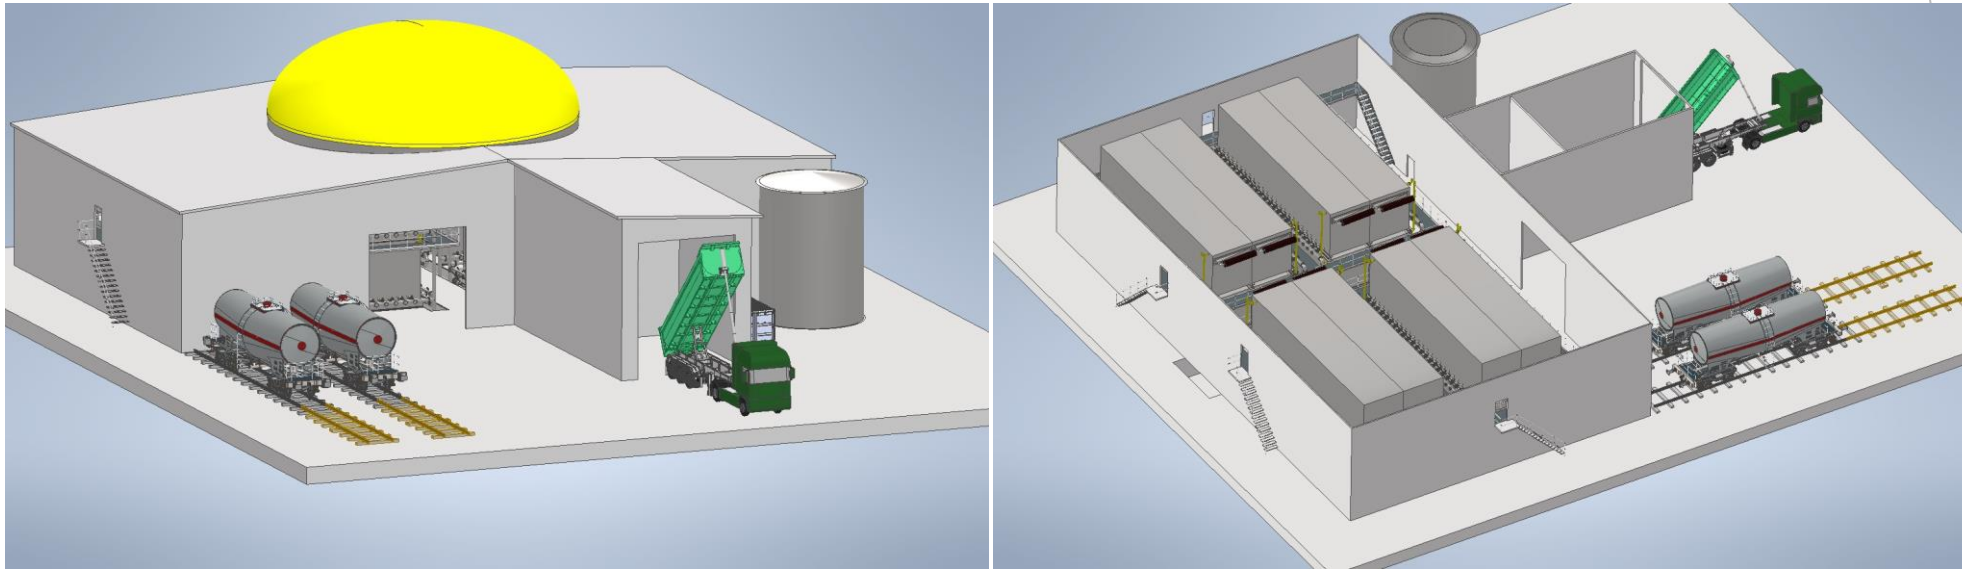

- Clean water
- Organic fertilizer
- CO₂
- Methane

FIDELIO
BIOGAS

Expertise - biogas plant design

Team experienced in biogas plant delivery, the current project for a universal biogas plant arose to meet the criteria of the competition Innovative Biogas Plant

Seeking an algae biotechnology partner

Horizon Europe: carbon capture, utilisation and storage

Open call for a partner with algae farming expertise

Aim: to close the carbon loop

Proposal: using three of the end products of waste treatment (clean water, organic fertiliser, CO₂), grow algae to address demand for algal end products, including, but not limited to, fuel, food, cosmetics, pharmaceuticals
