EMERGENCY MEDICAL HELICOPTER SERVICES

Sanela Stadler MSc.

AGENDA

Introduction:

1. The central issue is that emergency helicopter medical assistance is currently under the jurisdiction of the military, excluding the involvement of Slovenian commercial enterprises and civilian society in this field.
2. The reason is the lack of a law that would enable commercial enterprises to engage in this activity.

HELICOPTER MEDICAL CAPABILITIES

Helicopter medical services offer rapid response and access to remote areas, enabling timely transportation of critically ill or injured patients.

The ability to land in confined spaces and navigate challenging terrain is crucial for swift medical intervention.

"THE REGULATION OF THE FIELD AROUND THE WORLD."

- In the United States of America, HEMS (Helicopter Emergency Medical Services) and HAA (Helicopter Air Ambulance) operate in both the public and private sectors. Operators must obtain certification from the Federal Aviation Administration (FAA) and adhere to strict regulations for flight safety and medical care.
- In Canada, HEMS and HAA operators are required to obtain permission from the Department of Transportation (Transport Canada) and comply with regulations for aviation services and safety.
- Germany has a structured operation of HEMS and HAA operators within emergency medical service organizations and hospitals, both in the public and private sectors. Oversight encompasses personnel training standards and operational procedures.
- In Australia, HEMS and HAA operators must acquire permission from the Civil Aviation Safety Authority (CASA) and adhere to regulations for safety and operations.
- In France, HEMS operators function under the supervision of the Civil Aviation Authority (DGAC) in close collaboration with health authorities, where operations are regulated by both aviation and health regulations.
- SLOVENIA, Military of Slovenia has right and authority.

COMMERCIAL COMPANIES AND CIVIL ORGANIZATIONS

- Air Methods Corporation in the United States of America, specialized in HEMS and HAA operations,
- CHC Group, an international company providing various aviation services, including HEMS and HAA,
- Babcock International Group, an international company conducting diverse aviation operations, including helicopter medical transports,
- Falcon Aviation Services in the United Arab Emirates, also providing HEMS and HAA services,
- Babcock Scandinavian AirAmbulance in the Nordic countries, carrying out HEMS and HAA operations,
- HELI-EXPRESS in Italy, specializing in HEMS and HAA transport,

- Rega in Switzerland, specialized in emergency medical services and helicopter transports,
- Scandinavian MediCopter in Sweden, providing HEMS and HAA services.

"THEREFORE, COMMERCIAL COMPANIES
NEED OUR SUPPORT.

YOUR SUPPORT AND COLLABORATION IN
THIS PROCESS ARE CRUCIAL FOR
IMPLEMENTING CHANGES THAT WILL
BENEFIT ALL CITIZENS OF SLOVENIA.“

PLEASE TAKE A LOOK AT DOCUMENT
AND GIVE YOUR OPINION.
